

Benos Lab: Intelligent Systems for Healthcare

Our mission

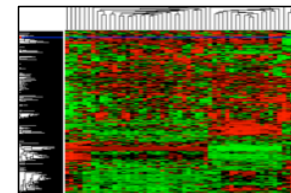

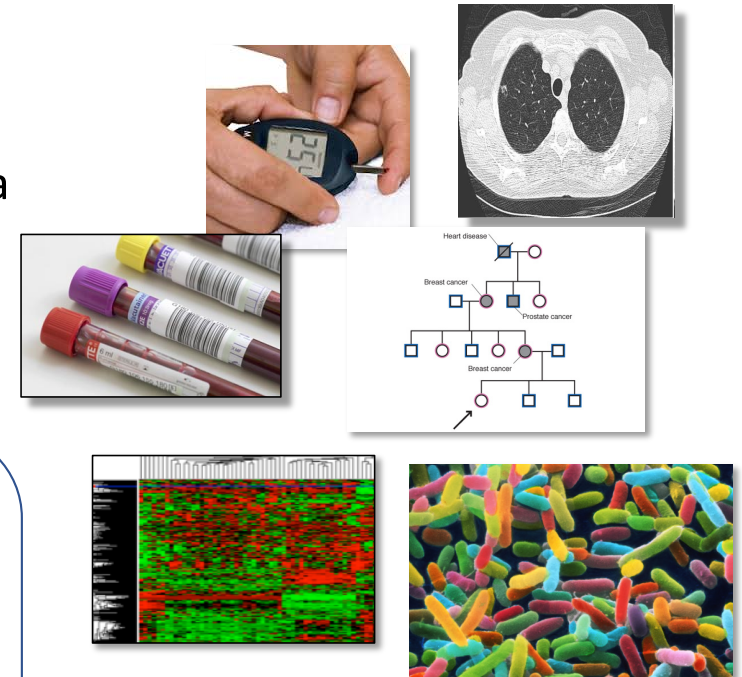

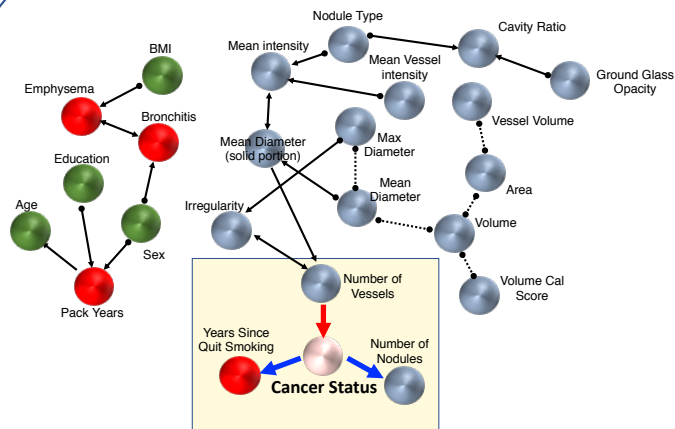

- Develop machine learning algorithms to improve precision health
- Study mechanisms of disease onset and progress

Benos Lab: Intelligent Systems for Healthcare

Our work

- Develop causal learning algorithms for mixed data
- Integrate multi-modal biomedical datasets
- Address important health problems

Benos Lab: Intelligent Systems for Healthcare

The Project

- Develop an app to collect patient data
- Collaborate with clinicians and grad students to analyze healthcare data

Requirements

- Experience with writing apps for Android and/or Apple iOS
